EDTC 5550 Final Project Requirements

In the second part of this course, EDTC 5555, you will create a website with an educational purpose. In this course, you will create the plans for that course in a final document containing the following:

- a visual hierarchy (site map) of your site  (Example: Duckett, pgs 461-462)
- an explanation of the EDUCATIONAL purpose of your site (at least 150 words)
- an explanation of the target audience of your site (at least 200 words) (Use Week 2 Discussion posting as a start for this.)
- an explanation of how you will create a unified structure and style for the site as a whole (at least 100 words, with specific techniques) (Duckett pages 465-472 will give some ideas.)
- wireframes from each of six pages in your web site, including the elements you would include on each of those pages  (Example: Duckett, pgs 463-464)
- details for EACH page on the wireframes should include such things as:
  - the text you’ll include
  - any images
  - the color scheme you’d like
  - the navigation links on each page
  - any html elements (e.g. using tables to layout the page, using an ordered list etc.),
- The total number of pages should be: a home page, and 5-6 other pages, linked together somehow

Submission:

- Upload your final project document to the drop box on WorldClassRoom by the end of week seven.
- Be ready to share your project with the class during the final week by presenting it “virtually”—more details to come!
